

In the overtaking lane:

DAVOSA Race Legend Quartz

25.09.2013: A tachymeter scale, a perfectly legible face and a pleasant fit were the central requirements for design of the *DAVOSA Race Legend*.

A sporty, masculine timepiece was the outcome, and its classic elements have a refreshing dynamism supported by choice of four possible colour schemes. A stainless steel case of 42 mm diameter, comfortable for the "average wrist", forms the basis of this model series. Scratch-proof sapphire crystal above and a screwed base ensure a long life, and it is water resistant to 5 bar. Signal colours of green, blue, orange or white will be found on the face, and on the leather strap model also in the stitching. A reliable Swiss chronograph movement shows

time, date, stop times and (in conjunction with the tachymeter scale on the bezel) also the speed in km/h.

The *DAVOSA Race Legend* will be in the shops from the beginning of October for as little as 328.- Euros.

Overview of the *DAVOSA Race Legend*:

- Reference numbers with leather strap: 162.477.15 (white), 162.477.45 (blue), 162.477.65 (orange), 162.477.75 (green)
- Reference numbers with metal bracelet: 163.475.15 (white), 163.475.45 (blue), 163.475.65 (orange), 163.475.75 (green)
- Stainless steel case (316L – surgical steel)
